

OPERATIONAL MAINTENANCE TRAINING

Maintenance training for users and maintenance staff.

Correct and timely operational maintenance is key to uninterrupted production according to specifications. Correct maintenance also avoids premature replacement of wear parts, reduces capital costs, minimizes the risk of breakdowns and improves your productivity.

What you get

- ✓ Training in daily, weekly and monthly operational maintenance for your maintenance staff and users
- ✓ Focus on maintaining constant performance according to equipment specifications
- ✓ Training based on the user manual, including both theory and practice

How you benefit

- ✓ Certainty of continued equipment performance
- ✓ Improved uptime
- ✓ Enhanced in-house competencies
- ✓ Extended equipment lifetime

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- On-site repair service • Installation & basic training • Remote diagnostic connection • Application assessment
- Overhaul services • Inspection services • Calibration – Struers certified • Calibration – Accredited
- On-site repair service • Preventive maintenance service • Struers workshop repair service • Practical training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
