

INSTALLATION AND BASIC TRAINING

Technical installation of equipment, final functional acceptance test and basic training.

You need your new equipment to be operational from day one. Struers ensures performance to specification from the moment you take over the equipment. Basic training means your staff can quickly become familiar with the equipment and use the correct work processes from the start.

What you get

- ✓ Equipment installation by Struers according to official checklist
- ✓ Final functional acceptance test
- ✓ Demonstration of main functions for easy operation by your staff

How you benefit

- ✓ Performance to specification from day one
- ✓ Confident users
- ✓ Productivity certainty
- ✓ Peace of mind

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- Installation and basic training • Remote diagnostic connection • Application assessment • Inspection services
- Overhaul services • Calibration – Struers certified • Calibration – Accredited • Preventive maintenance service
- On-site repair service • Struers workshop repair service • Practical training • Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
