

OVERHAUL SERVICES

General overhaul based on the standard general overhaul kit, or on inspection report findings performed on-site or at a Struers workshop.

Increasing wear and tear can impact both the predictability of your preparation quality and cost efficiency. This can be caused by demands for higher throughput as well as inadequate maintenance, and can also impact the lifetime of your equipment. Get the peace of mind of knowing that the condition of your equipment complies with safety standards.

What you get

- ✓ Component repair and part replacement by a Struers technical service engineer with detailed knowledge of your equipment (based on a previous inspection report)
- ✓ Equipment cleaning and adjustment/calibration for optimum performance

How you benefit

- ✓ Improved repeatability
- ✓ Productivity certainty
- ✓ Extended equipment lifetime

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- Overhaul services • Remote diagnostic connection • Application assessment • Inspection services
- Installation & basic training • Calibration – Struers certified • Calibration – Accredited
- Preventive maintenance service • On-site repair service • Struers workshop repair service • Practical training
- Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
