

CALIBRATION – ACCREDITED

Calibration of hardness testers, including indirect or direct verification of a chosen number of methods, performed and documented according to the locally applicable standard.

To ensure your hardness tester meets the required standards, we perform calibration according to internationally accredited certification standards. Calibration can be performed to suit your chosen hardness testing method (incl. load area, e.g. HV 1 and HRC).

What you get

- ✓ Calibration (indirect or direct verification) of hardness scales, according to accredited calibration standards
- ✓ Calibration to one hardness scale (additional scales can be included at a surcharge)

How you benefit

- ✓ Certainty of results according to accredited calibration standards
- ✓ Accredited calibration documentation

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- Calibration – Accredited • Installation & basic training • Installation & basic training
- Remote diagnostic connection • Application assessment • Overhaul services • Inspection services
- Calibration – Struers certified • Preventive maintenance service • On-site repair service
- Struers workshop repair service • Practical training • Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
