

PREVENTIVE MAINTENANCE SERVICE

On-site maintenance visit for one or more specific equipment units, including basic cleaning, replacement of wear parts, adjustments/calibration for optimal operation, inspection of equipment, and a final functional test.

Constant uptime without unexpected issues means the ability to keep pace with your sample preparation demands and deliver reliable results on-time. Correct maintenance means wear parts last until the next maintenance visit, and your equipment gives you constant repeatability and quality predictability. High-quality preparation and testing mean higher productivity with no time lost re-doing poor quality specimens or tests.

What you get

- ✓ Equipment inspection and a structured performance check by a skilled Struers technical service engineer
- ✓ Basic cleaning, replacement of standard wear parts, adjustments/calibration for optimum performance, software updates
- ✓ A service report with recommendations where relevant
- ✓ (The above is based on the standard maintenance service that Struers recommends every 1,500 hours of operation or once a year – whichever comes first)

How you benefit

- ✓ Higher uptime
- ✓ Higher uptime Certainty of results according to specifications
- ✓ Peace of mind
- ✓ Extended equipment lifetime

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single service at any time.

Struers offers the following single services:

- Preventive maintenance service • Installation & basic training • Remote diagnostic connection
- Application assessment • Overhaul services • Inspection services • Calibration – Struers certified
- Calibration – Accredited • On-site repair service • Struers workshop repair service
- Practical training • Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
