

//////////

APPLICATION ASSESSMENT

Summary of your use of Struers equipment, consumables and methods in an application assessment report.

Demands for shorter response times require focus on reliable results in terms of specimen quality and process reproducibility. Minimizing rework is always beneficial and often requires new views on processes. But limited time to sort, analyze and update knowledge and apply it in work processes makes progress challenging. External inspiration via application assessment benefits both new users and experienced materialographic staff.

What you get

- ✓ In-depth assessment of your use of Struers equipment, materialographic processes and workflows by an expert Struers Application Specialist
- ✓ Practical tips and hands-on collaboration to identify quality and productivity optimization opportunities
- ✓ An application assessment report based on Struers' global experience and knowledge of your specific application range
- ✓ Guidelines and recommendations for optimization and improvements to ensure the specified preparation quality and the highest possible level of repeatability and reproducibility

How you benefit

- ✓ Objective evaluation of current workflows, methods and practice
- ✓ Method repeatability
- ✓ Production optimization

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- Application assessment • Installation & basic training • Remote diagnostic connection
- Inspection services • Overhaul services • Calibration – Struers certified
- Calibration – Accredited • Preventive maintenance service • On-site repair service
- Struers workshop repair service • Practical training • Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
