

PRACTICAL TRAINING

In-depth training according to your specific requirements.

The preparation quality, predictability and productivity of your equipment and consumables depend on knowing how to use them properly. While all Struers equipment is designed to be easy to learn and operate, user training avoids uncertainty that can result in waste, poor sample quality and high operational costs. Practical training ensures competence, updates existing competencies and ensures that new users are trained to the required level.

What you get

- ✓ Tailor-made training according to your specific requirements by a Struers specialist. For example, topics could include:
- ✓ How to ensure preparation or testing quality
- ✓ How to develop methods and ensure predictability
- ✓ How to increase productivity
- ✓ How to operate the equipment
- ✓ How to clean and keep equipment in good working condition

How you benefit

- ✓ Preparation or testing quality according to specifications
- ✓ Greater efficiency
- ✓ Higher productivity
- ✓ Competent users

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- Practical training • Installation & basic training • Remote diagnostic connection • Application assessment
- Overhaul services • Inspection services • Calibration – Struers certified • Calibration – Accredited
- On-site repair service • Preventive maintenance service • Struers workshop repair service
- Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
