

MAINTENANCE TRAINING PACKAGE

Optimal daily maintenance
of the equipment

Maximal uptime

THE MAINTENANCE TRAINING PACKAGE KEEPS YOU PREPARED

Constant uptime without unexpected interruptions requires timely and correct equipment maintenance. One key reason to perform daily maintenance is to pre-empt premature wear part replacement, along with the associated impact on uptime and costs. By securing maintenance training of your staff, you contribute to equipment reliability and boost in-house expertise – both of which help ensure reliable specimen quality.

WHAT YOU GET

Your maintenance staff learns to perform standard preventive equipment maintenance, including:

- Equipment inspection
- Basic cleaning
- Standard wear part replacement
- Adjustments/calibration
- Functional testing

This hands-on training is a fully documented preventive maintenance service performed with your staff following the Struers service checklist and using original Struers standard wear parts. The training and checklist will form the basis of your maintenance staff's future maintenance work.

By following a formal equipment maintenance plan, your staff can ensure specified performance without unexpected issues between maintenance points. In the case of an unexpected event, they will be better able to make small adjustments themselves, or to explain the problem to a Struers help desk service officer, who will then be able to guide them to a solution.

Services	Maintenance Training
Preventive maintenance	✓
Operational maintenance training	✓

HOW YOU BENEFIT

Greater service flexibility

Your own well-trained service department can assist promptly – and knowledgeably involve Struers, if necessary, for the fastest, most efficient solution.

In-house service skills and improved equipment utilization

With capabilities in-house, your equipment is more likely to stay up and running and to recover more quickly in the event of an issue.

WHY CHOOSE STRUERS?

- Nearly 80 years' experience solving challenges like yours.
- Worldwide network with Struers technical service engineers.
- Global network of materialographic application specialists
- More than 92% of Struers customers globally are satisfied or very satisfied with Struers.*
