

CALIBRATION – STRUERS CERTIFIED

Calibration of hardness testers including indirect or direct verification of a chosen number of methods (hardness measure type and load area, e.g. HV 1 or HRC) or direct verification.

Repeatability is paramount in hardness testing for materials with stringent requirements. This can only be achieved with confidence using a hardness tester that is correctly maintained and that has been calibrated according to strict calibration certification demands.

What you get

- ✓ Calibration (indirect or direct verification) of one hardness scale
- ✓ Documentation of calibration in an official Struers certificate
- ✓ Calibration to one hardness scale (additional scales can be included at a surcharge)

How you benefit

- ✓ Struers certified Hardness testing calibration certificate
- ✓ Certainty of results according to specifications

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent or Protect Service Plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- Calibration – Struers Certified • Installation & basic training • Remote diagnostic connection
- Application assessment • Overhaul services • Inspection services • Calibration – Accredited
- Preventive maintenance service • On-site repair service • Struers workshop repair service • Practical training
- Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
