

INSPECTION SERVICES

Technical evaluation of the functionality and maintenance status of an equipment unit or group of units, summarized in an inspection report with service recommendations

Repeatable preparation quality depends on 100% functionality and properly maintained equipment. This is particularly important for equipment that is more than three years old and has not been maintained in accordance with Struers recommendations.

What you get

- ✓ Detailed inspection of equipment by a Struers technical service engineer to determine functionality and maintenance status
- ✓ A report summarizing the results
- ✓ Recommendations for how to obtain maximum value from the equipment and improve functionality and maintenance practice – extending the expected equipment lifetime

How you benefit

- ✓ Ability to pre-empt issues that can affect your production
- ✓ Ability to plan ahead, based on sound, objective findings

Struers Single Services

Single services focus on individual tasks that usually become necessary because of an issue affecting quality, efficiency or uptime. A single service typically resolves an isolated issue. If you use single maintenance services regularly, we recommend you consider a Prevent, Protect or Perform service plan instead.

You can book one or more single services at any time.

Struers offers the following single services:

- Inspection services • Installation & basic training • Remote diagnostic connection • Application assessment
- Overhaul services • Calibration – Struers certified • Calibration – Accredited • Preventive maintenance service
- On-site repair service • Struers workshop repair service • Practical training • Operational maintenance training

Why choose Struers?

- ✓ Nearly 80 years' experience solving challenges like yours
- ✓ Worldwide network with Struers technical service engineers
- ✓ Global network of materialographic application specialists
